*Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will **not** have standing to appeal the decision.*

In an effort to focus the analysis and facilitate the best use of public comments, the Forest Service is asking for specific input, such as;

- *What routes are most important for your favorite forest uses such as wood cutting, camping, hunting, driving, or recreational access?*
- *Since we are not going to keep all the routes, which area or routes are most important and why?*
- *What routes are redundant to your needs, or should not be used by vehicles?*

Please be as specific as possible and explain reasons **why** you recommend changes to Alternative B.
